This MP Box is a collapsible/foldable pallet cage of reliable and solid construction which consists of four detachable walls fixed to a 1200x1000mm pallet. One long wall has a folding window. The four walls are put together sturdily with centering pins and are fastened to the pallet with four bench hooks.

The walls can be assembled and detached by one person with only a few movements.

The detached walls of 7 boxes can be stored in only one MP Multibox, thus reducing the empty volume by 88%.
