This MP Box is a collapsible/foldable pallet cage of reliable and solid construction which consists of four detachable walls fixed to a 1200x1000mm pallet. This version is open on two short sides. The four walls are put together sturdily with centering pins and are fastened to the pallet with four bench hooks.

The walls can be assembled and detached by one person with only a few movements.

The detached walls of 7 boxes can be stored in only one MP Multibox, thus reducing the empty

volume by 88%.

Pleasant with return shipments and convenient in your warehouse as they take little space when empty.
